

MOVING IN?

RELOCATE WITH EASE USING NECTR'S
COMPREHENSIVE MOVE-IN CHECKLIST

ORGANISE YOUR ELECTRICITY

This will be the most important task on your checklist. Plan ahead and contact your energy provider to have the lights switched on the day of your arrival. Remember, Nectr allows for same day and next day move in connections (except Sunday's and Public Holidays) if you tell us before 2pm.

IT'S TIME TO DECLUTTER

Organise an eco-friendly packaging service that will cater to your needs by providing different sized boxes. Work your way through the smaller items in your house so that you can focus on the bigger ticket items on the day of. It will save you time and any unwanted stress.

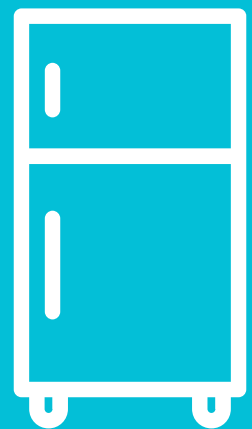

ORGANISE YOUR PLANTS

If you're a bit of a green thumb and need to relocate your plants, then you can repot your them with plastic bases to avoid shattering during your move. With smaller sized plants, we recommend pre-packaging them in boxes filled with newspaper to keep them safe.

PLAN FOR PERISHABLES

Leading up to your move, we suggest doing a lighter grocery shop so that you don't spoil any perishable items. Your fridge will be out of action for at least a day, so buy what you need for the week leading up to your move, then pack the remaining items you have left from your fridge into an icy cooler.

CHANGE YOUR DETAILS

It's important to notify relevant contacts that you've moved. Have you considered the following:

- contacting banks and health funds
- organising for your mail to be redirected
- taking out home and contents insurance
